

How to Access SAP Sales Cloud

Accessing SAP Sales Cloud

You can access SAP Sales Cloud using Internet Explorer.

For your **Nationwide Policies**, you can access SAP Sales Cloud from **the Agent Center Portal** by navigating to *Admin & Reports Tab > Reports*. Click the *Compensation — 2019 Forward* link on the page and you will be automatically logged in.

Once in SAP Sales Cloud, you will be defaulted to the Messages section within the Sales Performance Home module. Here you have access to the Dashboard, Messages, Reports, Account Settings and the Profile button, which you will use to access specific compensation statements.
